Dawn Dukes, OTM Consulting Ltd. dawn.dukes@otmconsulting.com
Telephone: Land +44 (0)1372 631950
- Directions:** See page 4
- Accommodation:** See page 5

Meeting Theme

The PACE members have decided to choose “New Barrier Materials” as the topic for the next meeting.

The Confidential Operator Forums are open to both PACE Member Companies and Guests, with the opportunity to present/ pitch new technologies to the PACE operator members without other service companies/ vendors present. There will be an open call for applications throughout October, from which the PACE Steering Committee will select 5 presenters to attend the session at this meeting.

Any confidential material shared in these sessions will be protected as in the PACE Membership Agreement, or alternatively presenters may choose to share only non-confidential information.

The Service Provider forums are also open to both PACE Member Companies and Guests. A new addition to this meeting, these forums are aimed at fostering joint solution provision among the service providers. The strict confidentiality terms of the operator forum will not apply, so presenters will be briefed accordingly.

The PACE Membership has decided to allow guests in the remainder of the meeting in order to bring additional solutions to the forefront and allow potential members the chance to see first-hand the benefits of being a part of PACE with a view to fostering the growth of the network. In addition, BSEE will have a representative at the meeting to talk about the regulatory challenges associated with P&A in the GoM.

Hosted by:

HALLIBURTON
