The PACE members have decided to choose “Digital P&A” as the topic for the next meeting.

The opportunity to present / pitch new technologies to the PACE operator members is open to both PACE Member Companies and Guests in the operators’ forum, without other service companies/ vendors present. Any confidential material shared in these sessions will be protected as in the PACE Membership Agreement, or alternatively presenters may choose to share only non-confidential information.

The Service Provider forums are also open to both PACE Member Companies. These forums are aimed at fostering joint solution provision among the service providers. The strict confidentiality terms of the operator forum will not apply, so presenters will be briefed accordingly.

The PACE Membership has decided to allow guests to attend the remainder of the meeting in order to bring additional solutions to the forefront and allow potential members the chance to see first-hand the benefits of being a part of PACE with a view to fostering the growth of the network. In addition, BSEE and other regulators are invited.

Please note that Day 1 will be hosted on REMO and Day 2 will be hosted on Teams.
